# PeoplePlanner Client Portal

Provides quick, easy, and secure access to essential data for your service users and service funders via a secure internet portal.

Your service users and funders can login to the portal where they are presented with a range of options from updating personal details, viewing invoices and reviewing feedback from their care giver. They can also provide feedback themselves on the care they have received which links back to the main system to be reviewed by the manager. The client portal helps to reduce admin time and costs and ensures that you have the correct client data, including address and contact details.

KEY BENEFITS

- Request changes to contact details
- View invoices
- Track progress of outcomes set and also input own scores
- Provide feedback on services delivered
- Enables accurate pay and invoicing
- Reduce admin time & costs
